One Studio × Binladin

A Partnership Proposal

$1M	10-20	$25K
Annual Investment	Ventures / Year	Monthly Ops

One Studio

WHO WE ARE

One Studio — Fastest Value Delivery

16+ Ventures

Government platform clients (Sentra), Salla marketplace products shipping now, co-founded ventures (xSpace, RevXAI, TaxFlow) — across enterprise, consumer, and platform economy.

Nala & 7 AI Agents

HQ orchestrator + finance agent (775+ balanced journal entries), web developer, integrations monitor, and a Venture Founder agent that generated 15 tasks and 4 strategic decisions autonomously.

FLOW v3.0

Validated through 19 panel meetings across 11 industries — fintech, gaming, healthtech, government, solo founders. Externally stress-tested, not internally rationalized.

Product Engineers

30+ team across Palestine, Jordan, Egypt, Turkey — transitioning from fullstack developers to product engineers with venture builder experience. They don't just code — they think in products.

TRANSPARENCY

Where We Stand Today

WHAT WE HAVE

- Government & enterprise clients on our platform — Google & Meltwater integrations, security-hardened, pen-tested
- Products live on Salla Marketplace with paying merchants
- 7 AI agents running real daily ops — accounting, web dev, portfolio monitoring, venture founding
- Graduated venture: iStoria ($100K MRR, 5M+ downloads)

WHAT WE NEED

- Capital to stop splitting team across services
- Saudi presence, network, and market credibility
- A partner who sees the long game in AI-native building
- Institutional relationships for GovTech/enterprise access

> *"We have the machine. We need the fuel and the launchpad."*

THIS CHANGES EVERYTHING

The Agentic Shift

Alaa — CEO Builds His Own Venture

CEO of One Studio, testing the new era by his own hand

6 days	Hours	0	Real
Full MVP delivered	Live iteration cycle	Developers needed	Client feedback loop
What used to take a team 6 months	Product updated between client calls	Venture validated before hiring began	Not a prototype — a working product shown to buyers

The CEO didn't wait for a team. He built, showed clients, iterated in hours, and **proved the market before spending a single dollar on engineering**. When developers joined, they inherited a validated product — not a guess.

⚡ **Next level — Qaym Doctory: Full Agentic Company**

5 AI agents (CEO, CTO, CMO, Content, Sales) built an entire company operation from a few lines of text — 7 strategy documents in **22 minutes**. The CEO agent pushed back on estimates demanding real numbers. Not just isolated agents — a **full venture builder with cumulative learning, ongoing collaboration, and real feedback loops**. We're heavily testing this model now.

From one person validating a venture in days, to an AI team building a company from text — **this is how we build**

THE PROPOSAL

Two Paths Forward

RECOMMENDED

PATH A — RECOMMENDED

Join the Studio

Invest directly in One Studio. Access the full portfolio, the team, and a **dedicated Micro Ventures portfolio** as an expansion arm.

- Full studio access — 16+ ventures, team, methodology
- New Micro Ventures portfolio built from inside
- Board seat & first right on Saudi opportunities
- Shared infrastructure, shared learnings

PATH B — ALTERNATIVE

A Separate Entity

Create a standalone Micro Venture entity focused **exclusively on Agentic-native venture building**. Clean, focused, new.

- Fresh entity — no legacy, pure focus
- Agentic-native from day one
- One Studio as the operating partner
- Clear scope: only new Saudi ventures

Both paths share the same engine: **One Studio's team, methodology, and AI infrastructure**

PATH A

Join the Studio

TODAY

- Revenue from outsourcing services
- Co-founding with early equity stakes
- Team split across client work
- Bootstrapped, limited by cash flow

$1M

PER YEAR

TOMORROW

- **Internal ideation engine**
- **Dedicated Micro Ventures portfolio**
- **Team focused on own ventures**
- **Agentic-native — 5-10x more efficient**

🏆 **Proof: iStoria — Graduated Venture**

Built from zero by this team. Graduated with a studio CTO who now owns 15%. This is what the machine produces.

$100K MRR

5M+ Downloads

🤝 **Already Proven: Dual Builder Model**

We run this exact structure today with a 40-year-old Saudi government technology company — 6+ ventures co-built through the same partner + studio model.

6+ Ventures

40yr Partner

PATH A — WHAT YOU GET

The Full Studio Experience

Enterprise Platforms
Sentra — government clients, Google & Meltwater partnerships, one codebase serving multiple institutions.

Marketplace & Micro Ventures
Salla apps shipping now. Plus 10-20 new agentic-native ventures per year at $50K each.

Co-Founded Ventures
xSpace, RevXAI, TaxFlow — domain expert + studio. The exact model Abdullah would get.

Board Seat
Governance, strategic input, and visibility into every venture decision.

First Right on Saudi
Every new Saudi venture goes through you first. Your network picks the winners.

Network × Ventures
Binladin distribution meets studio products. Your relationships become venture fuel.

> *"One investment — every path unlocked. The studio becomes a venture machine."*

PATH B

A Separate Micro Venture Entity

ABDULLAH BRINGS

- Growth capital ($1M/year)
- Saudi CR & entity
- Distribution network & wasta
- Government & institutional access
- Brand credibility in KSA

JV

ONE STUDIO BRINGS

- Tech team & product builders
- FLOW methodology + kill gates
- AI-native operations (Nala)
- 16+ venture building experience
- Idea pipeline & validation engine

10-20	$25K	100%
Ventures per year	Monthly operations	Agentic-native focus

✅ **Proven Precedent**

This exact JV structure runs today — a 40-year-old Saudi company provides entity + market access, One Studio provides tech + product. Together: 6+ ventures co-built including marketplace apps, consumer products, and AI-native operations.

THE MATH

$1M → 20 Ventures

14
Killed Fast (70%)
$700K invested, learnings captured

3
Small Wins (15%)
$5–20K MRR each

2
Real Businesses (10%)
$50–200K MRR each

1
Breakout (5%)
$500K+ MRR potential

Expected portfolio value: **3–15x** on $1M deployed — **in 1–3 years**, not 7–12

MARKET OPPORTUNITY

Capital Rich, Builder Poor

$1.5B
Saudi startup funding (2024)

1.2M+
SMEs underserved by tech

<5
Venture studios in KSA

$3.3T
Vision 2030 spending

🏠

PropTech
REGA sandbox, 70% homeownership target

🏛️

GovTech
Every ministry has digitization budget

💼

SME SaaS
1.2M+ businesses on WhatsApp + Excel

🏥

HealthTech
Hospital digitization mandate

🕋

Hajj / Umrah
30M visitors by 2030

💰

FinTech
SAMA sandbox, embedded finance

BOTH PATHS

The Numbers

ANNUAL INVESTMENT	
Studio Operations Team, AI tools, infrastructure	**$25K/mo**
Venture Capital 10-20 ventures × $50K avg	**$500K-$1M**
Total Annual	**~$1M/yr**

	TRADITIONAL VC	MICRO STUDIO
Concentration	$2M in 1 startup	$1M across 15-20
Time to signal	12–18 months	4–8 weeks
Cost of failure	$2–5M	$50K
Salvage value	Usually zero	Code, data, learnings

= Cost of **ONE** traditional startup raise. Buys **10-20** real market experiments.

PROOF POINTS

They Proved It. We're Doing It.

🏗️ **Idealab**
150+ companies, 50+ IPOs. 70% success. The original studio.

⚡ **Atomic**
$25-100K per test. Hims & Hers: $2B+ market cap.

📈 **Industry Average**
53% IRR for studios vs 21% traditional. 72% reach Series A.

OUR PROOF

🏆 **iStoria — Graduated**
Built from zero by this team

$100K
Monthly recurring revenue

5M+
App downloads

Studio CTO graduated with ownership. The venture machine produced a real, profitable company — not a slide deck.

🤖 **Agentic Operations — Live**
Running the studio today

7
AI agents in production

775+
Balanced journal entries

Venture Founder agent generating tasks autonomously. Finance, web dev, integrations — all agent-run. Not planning AI-native. Already there.

Your move.

Two paths. One studio. Same conviction.
